

Focus on Distributors

Robert Lee leave nothing to coincidence

Robert Lee is one of the leading distributors of bathrooms, sanitaryware and plumbing products in the UK today. Always proactive and at the forefront of bringing in new and exciting products from mainland Europe. One such product is Steinberg.

The Steinberg brand is a relative new-comer to the brassware industry, and was established by a group of individuals with themselves many years of experience in the field. The company is growing fast, and is currently active in more than 30 countries.

Steinberg's design philosophy is similar to the thoughts of the well know British designer Terence Conran, who was once asked "Can design create values?" He answered as follows "A well designed item can improve the quality of life of its user, and good design should not necessarily be more expensive" This is certainly true of Steinberg.

Its contemporary design philosophy with an emphasis on detail made it an obvious partner to the forward thinking Robert Lee.

Quality is the opposite of the coincidence. Every mixer developed and manufactured by Steinberg has been carefully designed, thoroughly tested and put through rigorous quality control. The result is outstanding quality, which is manifested visually by its design – that is what the name stands for. Nothing is left to coincidence.

This year sees the launch of two new mixer ranges, the Series 170 with its slim construction and accented oval shapes, and the Series 180 which has a truly unique dynamic style.

As with all Steinberg products, each Series has a range of matching accessories to ensure that the specifics of the design can follow right through the bathroom without compromise.

The new 'Tropical Rain' shower collection adds the final luxurious detail, comprising of ceiling mounted rain showers in circular, square, and rectangular shapes, for a truly magical showering experience. Steinberg can honestly claim to help make dream bathrooms become a reality and is exclusive in the UK to Robert Lee Distribution Ltd.
